

Task2: Console based mini project

Code:

```
import java.util.Scanner;

public class StudentManagementSystem {

    public static void main(String[] args) {

        try (Scanner sc = new Scanner(System.in)) {

            String[] students = new String[10];

            int count = 0;

            int choice;

            do {

                System.out.println("\nStudent Management System ");

                System.out.println("1. Add Student");

                System.out.println("2. View Students");

                System.out.println("3. Search Student");

                System.out.println("4. Exit");

                System.out.print("Enter your choice: ");

                choice = sc.nextInt();

                sc.nextLine();

                switch (choice) {

                    case 1:

                        if (count < students.length) {

                            System.out.print("Enter Student Name: ");

                            students[count] = sc.nextLine();

                            count++;

                            System.out.println("Student Added Successfully!");

                        } else {
```

```
System.out.println("Student List Full!");
}
break;
case 2:
if (count == 0) {
System.out.println("No Students Found!");
} else {
System.out.println("\nStudent List:");
for (int i = 0; i < count; i++) {
System.out.println((i + 1) + ". " + students[i]);
}
}
break;
case 3:
System.out.print("Enter Student Name to Search: ");
String search = sc.nextLine();
boolean found = false;
for (int i = 0; i < count; i++) {
if (students[i].equalsIgnoreCase(search)) {
System.out.println("Student Found!");
found = true;
break;
}
}
if (!found) {
System.out.println("Student Not Found!");
```

```

}
break;
case 4:
System.out.println("Exiting Program...");
break;
default:
System.out.println("Invalid Choice!");
}
} while (choice != 4);
}
}
}

```

Ouput:

```

Student Management System
1. Add Student
2. View Students
3. Search Student
4. Exit
Enter your choice: 2

Student List:
1. ridhima

Student Management System
1. Add Student
2. View Students
3. Search Student
4. Exit
Enter your choice: 

```

Concepts used:

- Class and main method
- Scanner class
- Arrays & Loops
- String Handling
- Basic CRUD Operations
- User Interaction
